A Letter from our Chairman

The year 2013-14 was a momentous one for Ganga Prem Hospice, when the construction of the inpatient facility started in February 2014 at its Gohri Maphi site in Rishikesh.

The Hospice received Corporate Social Responsibility (CSR) support from the Maharatna PSU: Bharat Heavy Electricals Limited (BHEL), for the construction of the first two floors of the East Wing of the Hospice. Our team worked diligently to secure all the administrative pre-construction clearances before the construction commenced in February 2014.

The charitable cancer clinic and home care service continued throughout the year and the home care programme saw the introduction of some senior palliative care doctors who came in as volunteers and did remarkable work in providing expert palliative care to our patients.

While the monthly cancer clinics saw more than 1,200 patients, the home care programme served one hundred and two terminally ill patients in the areas of Rishikesh, Haridwar and Dehradun.

Ganga Prem Hospice was a recipient of medicines, medical equipment, and other in-kind donations, which lightened the cost burden on our finances.

All in all, it was an eventful year for Ganga Prem as the construction of the Hospice's inpatient facility started after immense efforts, and as more human resource and volunteers continued to find their way to our team.

DS Negi (IAS Retd.)

Chairman, Shradha Cancer Care Trust

About Ganga Prem Hospice

Ganga Prem Hospice is a spiritually-orientated, non-profit hospice for terminally ill cancer patients. The Hospice provides medical, social, emotional and spiritual support for individuals and their loved ones as they face life threatening cancer, and in their ongoing grief.

Ganga Prem Hospice has been created to add other dimensions to the concept of hospice-the dimensions of spiritual care and holistic treatment. Ganga Prem Hospice exemplifies a fusion between medical care and spiritual perception. Eminent oncologists from Delhi have joined with spiritual seekers and holistic therapists

in the Rishikesh area to alleviate the physical and emotional pain of cancer patients and their grieving families.

The Hospice is being constructed in a village called Gohri Maphi, in Raiwala. The village is situated at the foot of the Himalayas near to the town of Rishikesh,

which is known for its spiritual culture and the many well-developed holistic centres.

The Concept of a Hospice

A hospice provides palliative care to chronic and terminally ill patients, aiming to help control their pain and other symptoms so that they can achieve

the best possible quality of life and death. A hospice offers personal and caring service to both patients and their loved ones by providing information, comfort and basic care.

At Ganga Prem Hospice, volunteers, social workers, spiritual advisers and nurses assist doctors in providing medical and holistic care to terminally ill cancer patients. All facets of the patient's life—the physical, social, emotional and spiritual, are considered to be of importance. Trained in patient-centred terminal care, staff and volunteers understand that each patient and her needs are unique.

Hospices provide solace and comfort to patients and their families and help them to adjust to the many challenges

and losses they face in the terminal phases of cancer. Often holistic by nature, palliative care can provide pain relief, symptom control and support at the time when it is most needed. After death, the hospice extends care to family and friends of the patient during their bereavement. In some cases, where the patient's families are destitute, an attempt is made to rehabilitate the family in case of the patient's death.

A hospice can provide care both through inpatient facility and also through home care service. It offers the possibility of a dignified death with minimal distress.

Our Activities

The Ganga Prem Hospice charitable cancer clinics are held on the last Sunday of every month in Rishikesh

Monthly Cancer Clinics in Rishikesh

Ganga Prem Hospice holds a charitable monthly cancer clinic in Rishikesh. The clinic is held on the last Sunday of every month at the Sardarni Nanki Devi-Punjab Sindh Kshetra Charitable Hospital, in Rishikesh. Surgical oncologist Dr AK Dewan, accompanied by other oncologists,

gynaecologists, general surgeons, general physicians, and an Ayurvedacharya sees an average of 90 patients at each clinic. The clinic begins at 9.00 am and finishes between 2.00 pm and 3.00 pm.

Most patients who come to the clinic are from lower-income brackets. Many people who come are already suffering from cancer and many more come with suspected cancer symptoms. New cases of cancer

are generally diagnosed at clinics and the patients are directed to the correct procedures. As much as possible, medicines are distributed free-of-charge at the clinic to under-privileged patients.

The Ganga Prem Hospice monthly charitable cancer clinics in Rishikesh offer:

- Screening of patients for signs of cancer;
- Oncological consultation for cancer patients;
- Counselling for cancer patients, terminally ill patients, and their families;
- Free of charge distribution of medicines;
- Guided meditation sessions;
- Palliative care for terminally ill patients;
- Free of charge essential oils massage;
- Pick up and drop back vehicle service for terminally ill patients when needed.

Periodic Cancer Clinics in Other Towns/Cities

In addition to the monthly cancer clinics in Rishikesh, additional clinics are held periodically in other towns and cities of Uttarakhand, notably Haridwar and Dehradun. The medical team travels to these cities often on the day before the monthly Rishikesh clinic and cancer clinics are held in hospitals and other premises, donated by supporters of the Hospice project.

Home Care Service for the Terminally ill

Ganga Prem Hospice has run a full-time home care service for terminally ill cancer patients since the year 2010. Patients in the geographical areas of Rishikesh, Haridwar and Dehradun are visited twice a week or more frequently, as per their needs, by the Ganga Prem Hospice nurses, and sometimes also by visiting doctors, nurses, and complementary therapists.

The visits provide medical, social, emotional and spiritual support to the patient and their families. Under-privileged patients' immediate needs, like that of food, nutrition and clothing are also assessed and help reached to them accordingly.

The home care service provides:

- Regular visits to patient's home by a:
 - A palliative care nurse;
 - Doctor (whenever possible);
 - Physiotherapist (whenever possible);
 - Complementary therapist (whenever possible);
 - Counsellor (whenever possible);
 - General volunteer (whenever possible);
- Medical care for patient as advised by oncologist;
- Complementary therapies for symptom relief and relaxation for both patient and family;
- Counselling for patient and family;
- Spiritual support for patient and family;
- General support for patient and family.

The Support-a-Cancer-Patient Scheme

The Support-a-Cancer-Patient Scheme gives donors an opportunity to sponsor cancer treatment or palliative care treatment for financially underprivileged cancer patients. Ganga Prem Hospice social workers assess applicants for benefit from this scheme and patients who are chosen have their diagnostic tests or treatment arranged for by the Hospice. In addition to sponsoring tests and treatment, the Support-a-Cancer-Patient Scheme ensures that the chosen patient and her family receive other basic essentials that they need such as food, clothing, and other provisions.

The Support-a-Cancer-Patient Scheme Provides:

- Sponsorship of treatment and medicines' cost;
- Nutritional support;
- Transport for treatment;
- Other financial support according to need (e.g., clothing, house rent).

The Bereavement Support Service Provides:

- Help with practical arrangements after the death of patient;
- Counselling—helping family members manage the process of grieving;
- A promise of continued support, if required.

Bereavement Support

The bereavement support service gives much needed support to family and friends after the patient has died.

The support, in select cases, continues until the loved ones feel it is no longer needed.

A deceased patient's wife being given bereavement support by Ganga Prem Hospice. She and her children were supported with food supplies and medicines for a long time after the passing away of the patient

Construction of the East Wing of Ganga Prem Hospice

BHEL Haridwar team during site visit on February 7, 2014

The layout (marking) for the excavation of the foundations was done in the first two days of February 2014, and the earthwork started soon after. The plain concrete cement (PCC) work for the foundation finished in early March and then work started on the column footings which were, in turn, completed before the end of March 2014.

The East Wing of the Ganga Prem Hospice is planned to have three floors in all.

The year 2013 saw extensive work being done on getting all the pre-requisite permissions for the planned construction of the Ganga Prem Hospice inpatient facility. The architectural drawings were finalised and submitted for approvals to the relevant authorities. At the same time, Ganga Prem Hospice went ahead with inviting technical bids from potential contractors for the upcoming construction of the building. Sealed technical and price bids were invited and opened with the bidders and a construction committee panel in attendance.

After a memorandum of understanding was signed with the Bharat Heavy Electricals Limited (BHEL) in January 2014, the construction work began in earnest in February 2014.

Ganga Prem Hospice Charitable Cancer Clinics

During the year 2013-14, Ganga Prem Hospice organised fourteen cancer clinics in all, two of them being in Haridwar, in addition to the monthly clinics in Rishikesh.

With 1,283 patients served, the average number of patients per clinic was 91.

The Ganga Prem Hospice charitable cancer clinics continued to be held for the sixth successive year on the last Sunday of every month at the Sardarni Nanki Devi-Punjab Sindh Kshetra charitable hospital in Rishikesh. Two cancer screening camps were held in Haridwar in conjunction with the Rotary Club of Ranipur. In all, eighteen doctors provided their expertise and services free-of-charge, to Ganga Prem Hospice, and its patients during the year at the various cancer clinics. These included

oncologists, gynaecologists, surgeons, palliative care physicians, orthopaedics, orthonolaryngologists, and physiotherapists. Meditation sessions were also held for patients and their families at the clinics.

Forty-two percent of the 1,283 patients seen at the cancer clinics during the year, had cancer. Breast cancer was the single most common malignancy seen among the patients. Category-wise, head & neck cancers were the most widespread cancers found.

Types of Cancers at the Ganga Prem Hospice Cancer Clinics

Male and Female Patients at Ganga Prem Hospice Cancer Clinics: 2013-14

Geographical Profile of Cancer Clinic Patients

While a majority of patients coming to the Ganga Prem Hospice cancer clinics continued to hail from Rishikesh—the base town, patients also came from Dehradun, Hariwar, Roorkee, Bijnor, Tehri Garhwal, Pauri Garhwal, Uttarkashi, Sahranpur, Chamba, Kotdwar, and other places. The maximum number of patients came from the states of Uttarakhand and West Uttar Pradesh.

Age Group of Patients

Most patients at the cancer clinics belonged to the age group above 40, accounting for 70% of all the patients seen.

Volunteer Support

Help from volunteers was crucial in keeping the clinics running efficiently. As the number of patients grew, so did the services. The Ganga Prem Hospice volunteers, nearly thirty of them, assisted with the

patient registration process, calling in of the patients, dispensing of medicines, scanning of prescriptions and record maintenance, as well as other jobs at the clinic.

The Ganga Prem Hospice Home Care Service

One hundred and two terminally ill cancer patients were served by the Ganga Prem Hospice home care team during the year 2013-14. The average number of patients served by the team each month was thirty-three although in May 2013, there were as many as forty-one patients receiving home care support.

Ganga Prem Hospice provides the state of Uttarakhand's only home care service to terminally ill cancer patients. The service is provided six days a week in the cities of Rishikesh, Haridwar and Dehradun. The team consists of a nurse, a nursing assistant and vehicle driver, with visiting nurses, doctors, and therapists from time to time. Two

volunteer palliative care doctors worked with the team between October 2013 and February 2014, thereby enhancing the quality of service given to the Hospice home care patients.

The elderly were the primary recipients of palliative care as 41% of the home care patients were above the age of sixty-one.

Place of Residence

The majority of patients continued to be from Rishikesh accounting for 47% of the total number of patients served. Despite the long travel distance for the home care team, regular visits were made to Dehradun where

different types of head and neck cancers accounted for over a quarter of the patients. Head and neck cancer often causes difficulties with eating when in the advanced stage resulting in the need for the home care team to frequently give advice on diet and assistance with Ryles tubes (Nasogastric feeding tubes).

Fifteen of the home care patients had abdominal malignancies.

Nursing Staff

The patients were served by three GPH nurses: one full time nurse, one nurse who worked part time in the town of Haridwar for six months up until May 2013 and one who joined GPH in February 2014.

A nursing assistant regularly accompanied the nurses on visits and helped with bathing some of the patients as well as doing massage.

the patient numbers grew. Dehradun patients accounted for 32% of the total number of patients visited over the whole year.

Cancer Types

Breast cancer was the most common type of cancer found among the home care patients. There were also four cases of cervical cancer and four of ovarian cancer.

Lung cancer was the second most prevalent type of cancer while

Patient Visits

The Ganga Prem Hospice home care team visited patients six days a week in the year 2013-14. They organised their schedules to carry out visits on two days per week in each of the locations of the towns of Rishikesh and Haridwar and the city of Dehradun. Patients from Rishikesh however were often included in the schedule on the Haridwar visit days due to the high numbers of patients living in Rishikesh.

The amount of travelling involved had an effect on the number of visits possible in one day. On the days the team was based in Rishikesh, less travelling time was needed than on Dehradun or Haridwar-based days enabling more patients to be seen on those days.

The total number of home care visits made throughout the year was 1,875 averaging out at 156 visits a month. Some patients and their families required intensive input from the team resulting in many hours being devoted to them on each trip. Visits varied from requiring minimal support and provision of medication to the management of complex cases which required a considerable amount of counseling and social support to assist with difficult family situations, the management of difficult symptoms or indeed both. For many patients, the physical, social, psychological and spiritual needs were great.

In addition to receiving nursing care such as the dressing of open wounds, catheter management, measuring of vital statistics, massage, and medical advice, the home care patients were provided with medicines/medical dressings, all free-of-charge. As the majority of home care patients came from under-privileged backgrounds, the Ganga Prem Hospice often provided food supplies and clothing to those families who were struggling with the financial burden of having cancer in the family. The GPH social worker and supporters of the Hospice helped to place several bereaved children in schools and helped find employment for widows.

Behind the scenes, the home care team was supported by a dedicated group of administrators who enabled the programme to run smoothly. Their tasks included arranging funds, keeping accounts, overseeing the medical record keeping, data entry and acquiring medical supplies and medicine donations in addition to managing the telephone help line.

Donations-in-kind

During the year a total of Rs 5,37,212 worth of medicines and medical equipment were donated in kind to the Hospice. In addition, another Rs 1,19,809 worth of medical supplies and medicines were purchased by GPH to meet the patient needs.

Home Care Service Statistics

Sixty-one new patients joined the home care programme during the year 2013-14. There were forty-seven deaths. Forty-three of these patients died at home and four died in hospital.

Support from Individual Volunteers and Organisations

A Belgium-based organisation, called "Volont'R" that encourages volunteer social initiatives, donated medical equipment and supplies to Ganga Prem Hospice in March 2014. Their representative, Madhu Sharma, visited

the Hospice cancer clinic on March 30, 2014, and handed the equipment over.

In February 2014, Ganga Prem Hospice bade goodbye to our long-time volunteer Steven Lopresti, as Steven left for his home country. Steven stayed in Rishikesh for four years, helping the Hospice with a multitude of admin, website and database related tasks.

Ganga Prem Hospice is being constructed in the Raiwala area of Rishikesh. The peaceful area has the uninterrupted view of the river Ganga and the Himalayan foothills a little distance away.

The non-profit Hospice will offer terminally ill cancer patients first-class medical facilities and spiritual solace. The hospice team will include oncologists, doctors from various specialities, professionals from holistic care systems and complementary therapies, physiotherapists, dietitians, social workers, grief and spiritual counsellors.

The Hospice inpatient facility will have clinics, a yoga and conference hall, dining hall, library, music and art room, a counseling room, among patients rooms and other medical, spiritual and recreational facilities. The Hospice will also have facilities for the disabled and a paediatric section for children with terminal cancer.
